

Product Information

Date: *July 25, 2011*

Product: NEware (End-user management software)

Subject: New version release, V4.20

Downloads: To download NEware V4.20 (Security version), [click here](#)*
To download NEware V4.20 (Security and access control version), [click here](#)*
*requires login name and password to download

Improvements: **Windows 7 compliant**
NEware V4.20 is now fully compliant with all Microsoft Windows 7 platforms.

Resolved issues: **Auto-arm time per partition**
With previous versions of NEware, when modifying the auto-arm time of partition 2 to 8, the modification would revert to the default value of partition 1 if you would navigate to another programming page.
This issue has now been resolved and the modified auto-arm values of all 8 partitions are saved accordingly in the software.
